

# ESAI Postgraduate Network

Come join the ESAI Postgraduate Network!

- The ESAI Council and College Liaisons network have recently identified the need to further improve our engagement with the early-stage research community.
- To help ensure we are doing everything we can to support our postgraduate student members, the ESAI Postgraduate Network will be formed, consisting of and led by early-stage researchers representing each third level institution in Ireland.
- The ESAI Postgraduate Network will work alongside the ESAI council to help bring together ideas and concepts from students, researchers, supervisors and course organisers on how to improve our overall activities and spread the word of ESAI's awards and projects to the wider environmental science community.
